Subject: FW: Very short Statement of Work needed

Got your message.

Will do.

Waiting for Raj to give me something for the PR.....

....then I can send to CindyC and her folks to get any comments/concerns on Raj's approach although I suspect he will just do what he thinks is right given his independence. .

Raj,

Can you do a really short statement of work for me with hours/cost on the method development for MCHM? I can expand on it if needed here..

(Might want to add PPH alsoor I could just use the same language for MCHM.)

Just need:

- General description of what you will be doing (use of carbon tubes, spiking the tubes, desorbing, trying to get to low detection limit, using GC/MS?)
- # of Lockheed Martin chemists
- their approximate hourly rate
- any incidentals

I can talk to management about whether or not we might get other standards for you to work on (and increase the funding)

or we just see how it goes with MCHM.....

Thanks!
